

Task 1

Build a responsive SaaS landing page using **Tailwind CSS**, with Flexbox for navigation and Grid for the feature section.

Typography

Element	Specification
Font	Inter
H1	48px, font-bold, line-height 1.1
H1 mobile	36px
Subtitle	18px, line-height 1.6
Section heading	32px, font-bold
Card heading	20px, font-semibold
Body	16px
Navigation	14px, font-medium

Color Palette

Background	#F8FAFC
Primary	#4F46E5
Primary Hover	#4338CA
Heading	#0F172A
Body	#475569
Card Background	FFFFFF
Border	#E2E8F0

Layout

- Maximum content width: 1200px
- Horizontal padding: 24px
- Navbar:
 - display: flex
 - justify-between
 - height: 72px
- Hero:
 - minimum height: 520px
 - vertically centered
 - text width: 650px
- Feature cards:
 - Desktop: **3-column Grid**

- Tablet: **2 columns**
- Mobile: **1 column**

Spacing

Navbar → Hero 80px

Hero heading → paragraph 20px

Paragraph → buttons 32px

Section → cards 48px

Card padding 24px

Card gap 24px

Responsive Requirements

< 640px

Navbar links hidden

Mobile menu button visible

Hero text centered

Buttons stacked

1-column cards

640–1023px

2-column cards

≥ 1024px

3-column cards
